

ODDS | Speed Detection & Alert System

INCREASE

GUARD FORCE REACTION
TIME FOR THREAT RESPONSE

WHAT IS ODDS? 

COMPONENTS

> **COMPUTER UNIT**
A small, made to order unit to be housed in your secured area. Displays the warnings produced from the sensors on screen.

> **RADAR SPEED SENSOR**
A complete Doppler Radar in a small, rugged, water-proof, cast-aluminum housing. Features the longest range available - up to 2 miles.

> **REMOTE DISPLAY UNIT**
Display unit with Network Capabilities, memory back-up during power outages, and updates via Windows. Data conversion for driving displays greater than 50 feet away.

PRODUCT OVERVIEW

ODDS

(Over-Speed Directional & Detection System)

Increases your facility's security. The ODDS package provides an advanced alert for potential vehicle threats which increases the response/reaction time and employs the barrier adding safety and reducing risks.

Alerts the Guard Force at an ACP that a vehicle is approaching at a high rate of speed in the inbound or outbound lanes. Reduce surprises. The ODDS package emits an alarm and displays a message to give increased time to effectively reduce potential risks. Alerts security if a vehicle is attempting to enter your facility through the exit lane.

Multi-functional

The system can be utilized with any USR security product and has the capability to be used in conjunction with any barrier product or security system to improve ACP functionality and safety.

Applications

The ODDS system is designed to alert guards of potential threats by detecting vehicles traveling at a high rate of speed and by alerting vehicles entering or exiting in the wrong direction. These benefits have made ODDS an ideal security solution for many applications such as:

- Military Facilities
- Government Buildings
- National Laboratories
- And many more...
- Corporate Entrances/Exits
- Airports
- Borders and Checkpoints
